

HINGED SCREEN DOOR MEASURE GUIDE

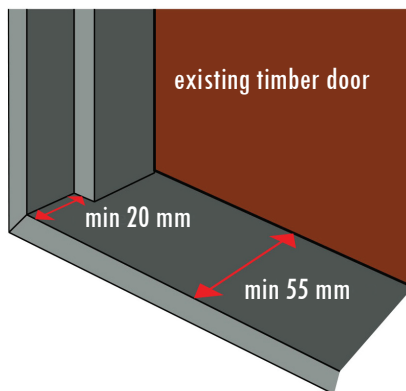

YOU MUST MAKE YOUR OWN DEDUCTIONS

The sizes you provide will be the exact size we make your door.

IMPORTANT: Always measure from the outside looking in; this will prevent confusion as to the correct lock and hinge side. Measure exactly where you want the door to be installed and be accurate, measurements must be to the nearest millimetre.

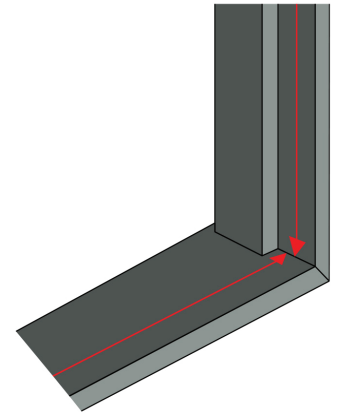

OPTION 1: MEASURE THE EXISTING SCREEN DOOR

If you have an existing screen door and you are happy with the fit then we suggest that you measure this door and use the measurements for your new door.

DO YOU HAVE ENOUGH ROOM FOR THE DOOR?

Our screen door frames are an industry standard 20 mm in thickness and require a minimum rebate of 20 mm; with the addition of the screen door handle 55 mm clearance in total is required between the solid /timber door and the outside edge of the screen door rebate.

1. HEIGHT & WIDTHS

WIDTHS: Measure the top, middle and bottom widths of the existing screen door; send us all three measurements.

HEIGHT: Measure from top to bottom of the existing screen door on both the left and right hand sides; send us the shortest of the two measurements

2. MEASURING LOCK HEIGHT

You can use the existing lock hole cut out if desired; first make sure that the new handle will not interfere with the existing solid door handle, do this by referring to the **Lock Above & Lock Below** instructions below.

Measure from the bottom of the existing screen door up to the centre of the existing striker, this will be the centre of the new striker and screen door handle.

HINGED SCREEN DOOR MEASURE GUIDE

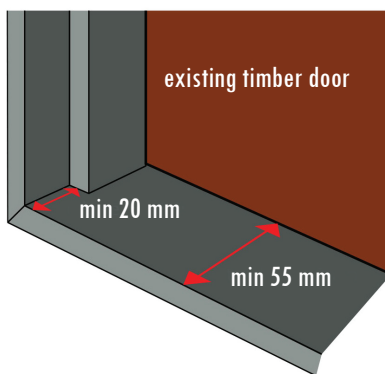

YOU MUST MAKE YOUR OWN DEDUCTIONS

The sizes you provide will be the exact size we make your door.

IMPORTANT: Always measure from the outside looking in; this will prevent confusion as to the correct lock and hinge side. Measure exactly where you want the door to be installed and be accurate, measurements must be to the nearest millimetre.

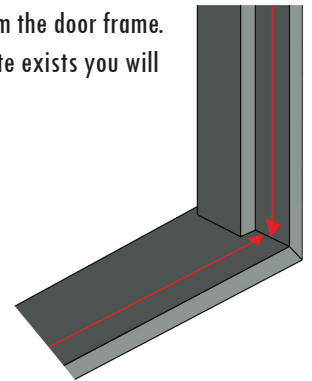

OPTION 2: MEASURE FROM THE JAMB FOR A NEW SCREEN DOOR

If there is no existing screen door or an ill-fitting door you will obtain the best results by measuring from the door frame. Make sure the measurements are taken from inside the rebate where the door will be fitted; if no rebate exists you will need to create one using stop bead or an aluminium jamb adaptor.

DO YOU HAVE ENOUGH ROOM FOR THE DOOR?

Our screen door frames are an industry standard 20 mm in thickness and require a minimum rebate of 20 mm; with the addition of the screen door handle 55 mm clearance in total is required between the solid /timber door and the outside edge of the screen door rebate.

1. HEIGHT & WIDTHS

WIDTHS: from inside the rebate measure the width of the opening at the top, middle and bottom of the door frame, for each, deduct 8mm for a single lock or 9mm for a triple lock.

HEIGHT: Measure the height of both the left and right side; deduct 8mm from the shortest side.

2. MEASURING A NEW LOCK HEIGHT

Stand outside and close the main door; establish if the screen door handle should be on the left or right hand side of the screen door, and if it should be fitted above or below the solid door handle. The use the instructions below to measure for the new lock height.

3. MEASURING FOR AN EXISTING LOCK HOLE CUT OUT

If the door jamb already has a cutout for the lock and you choose to re-use this hole, measure from the bottom sill to the centre of the lock hole then deduct 4 mm.

Terms & Conditions

Measuring & Deductions

Always measure from the outside looking in when providing the lock side for your screen door and measure the lock height from the bottom of the door.

The final measurements submitted must be the make sizes for the new screen door. If measuring an existing screen door provide the exact sizes to the nearest millimetre. If measuring for a new door, follow the measuring guides provided.

If you are unsure at any point during the measuring/ordering process, please contact our office for clarification 1300 283 918.

Measurement Errors

It is important you read all measurement information supplied by Doolans Group Home Improvements to ensure your product fits correctly. Doolans Group Home Improvements manufacture to your exact measurements, please ensure you make your own deductions. Doolans Group Home Improvements hold no responsibility if you have made incorrect measurements.

Colour Selection

Door frame and grille colours displayed online are not a true representation of the powder coated aluminium frame colours, all efforts have been made to match them as closely as possible however it is recommended that you request a sample if you are not matching a known colour; colour selection remains the responsibility of the buyer.

Cut Down

In the event your product is too big a cut down service is available; for doors the charge is currently \$140.00 plus freight charges to return the door to our factory for repair and to return the door to you the customer. It is important to note that your product needs to be packaged in the same way it was received so to ensure it arrives at our factory safely. If the door does not arrive safely - the damage is the responsibility of the customer.

Returns Policy

Doolans Group Home Improvements offers custom made security and screening products manufactured to your specific requirements, as such do not offer refunds for change of mind, incorrect colour selection, incorrect mesh selection or incorrect frame size selection.

If your product is damaged in transit Doolans Group Home Improvements are responsible for the damage and will take the necessary steps to ensure you receive your product in perfect condition.

If within 24 hours of purchasing you need to cancel your order please contact the office to discuss; after this time you may be charged a restocking fee for purchased materials or if your order has already been manufactured will fall under the no refund policy.

Manufacturing Time Frame

The standard manufacturing time frame is currently 10 - 14 working days from the date of purchase; this timeframe may be extended for the following reasons:

- During peak periods
- After promotional events
- Supplier stock shortages
- Delivery delays

Under any of these circumstances Doolans Group Home Improvements will contact the customer to advise of the delay and provide an estimated time of completion.

Statement of Understanding

I confirm that I have read/viewed all relevant measure and installation guides as provided by Doolans Group Home Improvements

I confirm that the measurements I have provided are "make" sizes with all recommended industry standard deductions have been made.

I understand that Doolans Group Home Improvements will manufacture to the exact sizes I have supplied and that it is not the responsibility of Doolans Group Home Improvements to make deductions or alterations to the supplied measurements.
